

## **Types**

### One concept, two sizes

The EOS series combines all functions of a solid label printer with highest operating comfort.

# *EOS*2, the compact one for label roll diameters up to 152 mm

Label printer	EO	<b>S</b> 2	
Printable resolution	dpi	203	300
Print speed	up to mm/s	150	150
Print width	up to mm	108	105.7
Label roll diameter	up to mm	152	152
Power supply	100 - 240 VA	C, 50/60 Hz	

## **eo**S5 for large label rolls

with diameters up to 203 mm

Label printer	EO	S 5	
Printable resolution	dpi	203	300
Print speed	up to mm/s	150	150
Print width	up to mm	108	105.7
Label roll diameter	up to mm	203	203
Power supply	100 - 240 VA	C, 50/60 Hz	

## Mobile printing

in production, warehousing or agriculture, wherever labels are required and access to electricity is missing. 24 V input voltage enable the printer to be power supplied by any powerful battery. For technical battery data see accessories

### **eo**S2 mobile

for label roll diameters up to 152 mm

Label printer		EOS 2 mobile
Printable resolution	dpi	300*
Print speed	up to mm/s	150
Print width	up to mm	105.7
Label roll diameter	up to mm	152
Power supply		16.5 - 25 VDC

### **eo**\$5 mobile

for label roll diameters up to 203 mm

Label printer		EOS 5 mobile
Printable resolution	dpi	300*
Print speed	up to mm/s	150
Print width	up to mm	105.7
Label roll diameter	up to mm	203
Power supply		16.5 - 25 VDC

## **Details**

To achieve accurate imprint with slim materials and ribbons, slim print rollers are needed. These prevent from print roller wear, print head contamination and errors during material feed.

#### Roll holder

The label roll is inserted and automatically centered when closing.

#### Ribbon holder

The stop can be adjusted according to the ribbon width.

#### Print head 203 / 300 dpi

In case of cleaning or wear, the print head can be replaced easily by hand without tools.

#### 4 Label sensor - gap or reflective

The sensor position can be adjusted via a spindle using the red rotary knob. The chosen position is indicated by a LED.

#### Print roller DR4

In case of cleaning or wear, the print roller can be replaced without tools.

#### 6 Material guide

Using the rotary knob, the guides can be adjusted to the material width

#### 7 Tear-off plate

made of thin sheet steel: jagged, so labels are cleanly separated

## Operation panel

Intuitive and easy operation with self-explanatory symbols to configure the device setups

1 LED signal: Power ON

Status bar: Data reception, Record data stream, Ribbon pre-warning,

SD memory card / USB memory stick, Bluetooth,

WLAN, Ethernet, USB slave, Time

3 Printer status: Ready, Pause, Number of printed labels per print job,

Label in peel-off position, Awaiting external start signal

USB slot for the Service Key or a memory stick,

to load data in the IFFS storage

**5** Operation:

Cutter / perforation cutter: cutting Tear-off mode: print label

Jump to menu

Stop and delete all print jobs

Reprint last label

Label feed

Interrupt and continue print job

## Interfaces on the back of the device

- 1 for a SD memory card
- 2 x USB host to connect a Service Key, USB memory stick, keyboard, barcode scanner, USB Bluetooth adapter, USB WLAN stick
- 3 USB 2.0 Hi-speed Device to connect a PC
- 4 Ethernet 10/100 BASE-T
- 5 RS232C 1,200 to 230,400 baud/8 bit

## Label software cablabel S3

#### Designing, printing, administrating

cablabel S3 opens up the full potential of cab devices.

First of all, the label must be designed. Only when it comes to printing it has to be decided whether the label shall be processed on a label printer, a print and apply or marker laser system. cablabel S3 is of a modular design which makes it adaptable to requirements step by step. To support functions like native JScript programming, elements such as the JScript Viewer are embedded as plug-ins. The designer user interface and the JScript code are synchronized in real time. Special functions like the Database Connector or barcode testers can be integrated. For further information see www.cab.de/en/cablabel

- Toolbar to create different label objects
- 2 Tabs to quickly switch from one running label design to another
- 3 Layers to administrate different label objects

- Obesigner simplifies the design and displays the label WYSIWYG
- 5 Printer spooler to monitor all print jobs and the state of the printer
- 6 **Drivers**for setting and the communication with devices

## Printing in stand-alone operation

This operating mode is the printer's ability to select and print labels even when it is not connected connected to a host system.

The label has to be designed with a software such as cablabel S3 or by direct programming with a text editor on a PC. Label formats, texts, graphics as well as database contents are stored on a memory card, a USB memory stick or in the internal IFFS memory.

Only variable data are sent to the printer via a keyboard, a barcode scanner, scales or other host systems and/or recalled by the Database Connector from the host and printed.

## Printer control

#### **Drivers**

To control the printer with a software other than cablabel S3, cab provides drivers in 32/64 bit for operating systems starting from Windows Vista, Mac OS 10.6 and Linux with CUPS 1.2.

#### Windows<sup>1)</sup> drivers

cab printer drivers are certified according to WHQL. They ensure optimum stability on the Windows operating system.

#### Mac OS X<sup>2)3)</sup> drivers

cab provides CUPS-based printer drivers for Mac OS X applications.

ABC

#### Linux drivers3)

Linux drivers are CUPS-based.

Drivers are offered on the DVD delivered with the printer and for free download at www.cab.de/en/support

#### **Programming**

**JScript** 

To control the printer, cab has developed the embedded programming language JScript. See manual for free

download at www.cab.de/en/programming

#### abc Basic Compiler

In addition to JScript and as an integral part of the firmware, it allows advanced printer programming before data are sent to printout. For example, external printer languages can be replaced without interfering in the current print job. Also data from other systems such as a scale, a barcode scanner or PLC can be integrated.

## Printer administration

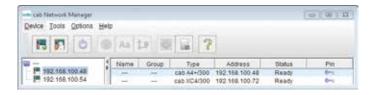

## Configuration in Intranet and Internet

The HTTP and FTP server integrated in the printer via standard programs like a web browser or FTP clients allows printer control and configuration, firmware updates and memory card administration. Via email or SNMP, the SNMP and SMTP client datagram sends status, warning and error messages to administrators and users. Time and date are synchronized by a time server.

### Network Manager in preparation

It is possible to simultaneously manage several printers within the network. Control, configuration, firmware updates, memory card administration, data synchronization and PIN administration are supported from one single location.

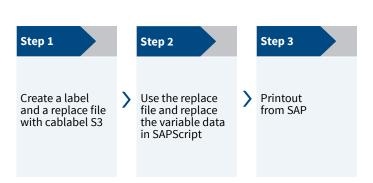

#### Integration

SAP

#### Printer Vendor Program

As a partner in SAP's<sup>4)</sup> Printer Vendor Program, cab has developed a replace method to enable easy control of a cab printer via SAPScript from SAP R/3. Only variable data are sent to the printer by the host. Pictures and fonts that had priorly been stored in the local memory (IFFS, memory card, etc.) are merged.

### **Database Connector**

Printers connected to a network may directly access data from a central ODBC or OLEDB-ready database and print it on a label. While printing, data can be rewritten to the database.

- 1) Windows is a registered trademark of Microsoft Corporation
- <sup>2)</sup> MAC OS X is a registered trademark of Apple Computer, Inc.
- <sup>3)</sup> Only for device series SQUIX (except of SQUIX MT), MACH 4S, EOS, Hermes+ and PX
- 4) SAP and all corresponding logos are trademarks or registered trademarks of SAP SE

# Accessories for all types of devices

2.3	Print roller DR4-25 Material width up to 25 mm; synthetic rubber coating for accurate imprint
-	Print roller DR4-50 Material width up to 50 mm; synthetic rubber coating for accurate imprint
2.4	<b>External operation panel</b> providing the same functionality as on the printer
	Users are free to choose whether to operate the printer on the external panel or on the one integrated in the device.
	Printer connection: USB 2.0 Hi-speed device
	Connecting cable USB, length 1,8 m
	Connecting cable USB, length 3 m
•	Connecting cable USB, length 5 m
2.5	SD memory card 8 GB

2.6	USB memory stick 8 GB
2.7	<b>USB WLAN stick</b> 2.4 GHz 802.11b/g/n
2.8	USB WLAN stick 2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac in infrastructure mode with rod antenna for extended reach
2.9	USB Bluetooth adapter
2.10	Label selection - I/O box Up to 16 different labels per box can be selected from the memory card by a master control, e.g. PLC. Two boxes can be connected. The I/O box allows simple PLC control processes with four inputs and outputs each via abc programming.
3.1	Connecting cable RS232 C 9/9 pin, length 3 m

#### Cutter

All printable materials can be cut. The cutter can be pivoted to exchange the material.

		Cutter
Technical data		for EOS 2, EOS 5
Material Width	mm	120
Weight cardboard gr/m <sup>2</sup>		60 - 240
Thickness	mm	0.05 - 1.1
Cutting length	from mm	10
Gap height	up to mm	2.5
Cuts/min	up to	200
Label winding		preferably outside
Monitoring		Cutter pivoted, final cutter position has not been reached

#### Cutter and perforation cutter

Continuous materials such as textiles or shrink tubes are perforated before they are manually separated. In addition, the materials can also be cut. The cutter can be pivoted to exchange the material.

		<b>Cutter and perforation cutter</b>
Technical data		for EOS 2, EOS 5
Perforating	Web distance mm	2.5
	Web width mm	0.8
Material Wid	th mm	45
Wei	ght cardboard gr/m	60 - 240
Thic	ckness mm	0.05 - 1.1
Cutting leng	th from mm	10
Gap height	up to mm	2.5
Cuts/min	up to	200
Label winding		preferably outside
Monitoring		Cutter pivoted, final cutter position has not been reached

## Accessories

#### **External unwinder**

When inserted, the material rolls are automatically centered. The unwinder cannot be installed with EOS mobile.

		External unwinder
Technical data		for EOS 2, EOS 5
Roll diameter	up to mm	390
Core diameter	from mm	38
Winding		outside or inside
Roll weight	up to kg	4

#### **Brake for fanfold labels**

for EOS 2 and EOS 5. The fanfold material is tightly fed in the printer and printed precisely. The brake cannot be installed with EOS mobile.

#### **Battery pack**

with a charger unit already included for mobile operation. It is installed under EOS mobile. Per battery capacity, a maximum of 500 print jobs with a label size of 100 x 68 mm and 15 per cent density may be processed.

		Battery pack 2
Technical data		for EOS 2, EOS 5
Nominal voltage	V	18
Capacity	Ah	2.1
Power	Wh	36
Charging time	approx. h	2
Charging voltage		100 - 240 VAC, 50/60 Hz

## cab product overview

Label printers MACH1, MACH2

in the lower price segment

Label printers SQUIX 2

Industrial device for print widths up to 57 mm

Industrial device for print widths up to 108 mm

**Label printers XD4T** 

for double-sided printing

**Print modules PX** 

to be integrated in labeling machines

Label dispensers HS, VS

for horizontal or vertical dispense

Label printers MACH 4S

where little space is available

**Label printers SQUIX 4** 

**Label printers XC** 

for two-color printing

Labels

made from more than 400 materials

Labeling heads IXOR

to be integrated in labeling machines

#### Label printers EOS2

Desktop device for label rolls up to diameter 152 mm

Label printers SQUIX 6.3

Industrial device for print widths up to 168 mm

Print and apply systems HERMES Q

for automation

Ribbons

in wax, resin and resin/wax qualities

Marking lasers XENO 4

in 19" housings

#### **Label printers EOS5**

Desktop device for label rolls up to diameter 203 mm

Label printers A8+

Industrial device for print widths up to 216 mm

Print and apply systems Hermes C

for two-color printing and applying

Label software cablabel S3

Design, print, control

**Laser marking systems** 

in desktop housings
