

TSC PrintSuite Tailored to Your Business

TSC PrintSuite

Expand your printing capabilities with TSC PrintSuite integrated solutions

TSC PrintSuite offers users a comprehensive tool kit of integrated technology and various hardware and software add-ons to enhance the performance of TSC printers. Upgrade your printers with compatible accessories, manage your fleet remotely with powerful printer management software, reliably connect to a variety of communication platforms, and do more with integrated software packs like label design software and much more.

Sophisticated TSC Sense Care

- TPH and Cutter Applications
- Top and Bottom Sensors
- Smart Battery

Dynamic Remote Printer Management

- TSC Console
- SOTI Connect

Multi-Connectivity

- 802.11ac Wi-Fi with Bluetooth 4.2
- MFi Bluetooth 5.0
- NFC Tag
- GPIO

Integrated Software Pack

- TSC Standalone Creator
- BarTender UltraLite
- Mobile Utility
- Software Development Kit (SDK)

Smart and Preventive – Sophisticated TSC Sense Care

TPH and Cutter Applications

These self-diagnostic tools provide better visibility over the printer's status. Users receive an early replacement notification and get near real-time updates to prevent unexpected downtime

Top and Bottom Sensors

Provides greater flexibility in support of various media including black mark and gap media

Smart Battery

Intelligently designed battery ensures productivity over a full shift and monitors battery health as well as remaining capacity to avoid downtime

Managed and Real-Time – Dynamic Remote Printer Management

TSC Console

A software for quickly and remotely monitoring printers, configuring settings, deploying programs, and troubleshooting problems

SOTI Connect

A single and unified solution that provides enterprise printer management to manage multiple tasks, reduce maintenance costs, and avoid downtime of business-critical devices

Connected and Seamless – Multi-Connectivity

802.11ac Wi-Fi with Bluetooth 4.2

Dual-band Wi-Fi featuring a fast roaming and reliable connection with enterprise-grade security

MFi Bluetooth 5.0

A certified MFi Bluetooth 5.0 enables reliable connectivity across various platforms and makes compatibility easy

NFC TAG

With an NFC tag the Tap to Pair feature makes Bluetooth pairing quick and secure by a touching two devices together

GPIO (General-Purpose Input/Output)

Used to perform digital input and output functions while compatible with mainstream applicators and emulations

Convenient and Efficient – Integrated Software Pack

TSC Standalone Creator

An exclusive software that makes updating interactive touch panel menus and label designs easy by using an icon-based drag-and-drop interface for TSC printers – no programming experience required

BarTender UltraLite

A straightforward and easy-to-use label generator which is ideally suited for small businesses

Mobile Utility

A newly developed Mobile App (Android and iOS) allows users to have printer configurations, troubleshooting, web print, and enabling of browser-based applications

Software Development Kit (SDK)

Developers have the flexibility to create custom applications for specific business needs
